

Kingdom Organics - Store Partner

Fresh, organic and specialty, delivered. Tralee pilot. 2026.

The problem

You pay the big delivery apps 25 to 35 pct of every online order, and they keep the customer.

Our model, one fair commission

A single 3-zone commission that never changes, for groceries and for takeaway alike:

15 pct within 5 km, 20 pct to 12 km, 28 pct beyond. The longer the run, the more the store and the driver both earn.

What you actually keep

On 2,000 EUR of weekly orders against a 25 pct big delivery app:

- Them: 500 EUR a week
- Us at 15 pct: 300 EUR a week

You save about 10,400 EUR a year, and the customer stays yours.

The customer sees one small fee

Total EUR 3.99, shown upfront: Delivery 2.50 plus a 1.49 service fee. One transparent line, no stacking, no checkout surprise. Families are not nickel-and-dimed.

Growth and Enterprise packages, for stores

Supermarket-grade online sales, the multimodal inventory scan, live tracking and delivery - things Wix or Shopify do not do. Pilot stores get the package at 50 pct off. The commission is separate and never discounted.

Pilot, Tralee Stage A

3 stores, 4 to 6 weeks. Asset-light, couriers in their own cars. No lock-in, cancel anytime, your data is yours.

Drivers paid properly

Zone-scaled per drop, keep 100 pct of tips. Heavy cold grocery rounds pay more so it is worth their fuel. A guaranteed window, not a gig gamble.

Your data, your rules

GDPR, we do not resell or retain private customer data beyond what delivery needs. You own the relationship.

The close

Keep the customer, pay a fair flat commission, and gain a tool even the supermarkets would envy.
First 3 Tralee stores get the package at 50 pct off.
